www.linkedin.com/in/u-kedharnath | https://github.com/kedhar9391

## Professional Summary

Recent **Master of Technology postgraduate in Computer Science Engineering** with strong proficiency in **Java, Spring Boot, React.js and MySQL/MongoDB**. Skilled in designing and developing **full-stack web applications, RESTful APIs, and scalable backend systems**. Hands-on experience with **JWT authentication and real-time data processing** through academic and project work. Familiar with **Git and GitHub practices**. Seeking a **Java Full Stack Developer** role to contribute to building high-performance, secure, and scalable applications.

## Technical Skills

- **Programming Languages:** Java
- **Web Technologies:** HTML5, CSS3, JavaScript, React.js
- **Database Management:** MySQL, MongoDB
- **Tools & Platforms:** Git, GitHub, VS Code, Postman
- **Backend Technologies:** Spring Framework (Spring Core, Spring MVC, Spring Boot), Hibernate (ORM Framework), JDBC (Java Database Connectivity), RESTful Web Services (REST APIs).
- **Concepts & Technologies:** REST APIs, Web-Sockets, JWT Authentication

## Education

**Master of Technology (M.Tech) in Computer Science Engineering** **06/2024 – 06/2026**
St. Johns College of Engineering and Technology (Autonomous), Yerrakota, Yemmiganur
CGPA: 8.22/10.0

**Bachelor of Technology (B.Tech) in Computer Science Engineering** **06/2019 – 05/2023**
St. Johns College of Engineering and Technology, Yerrakota, Yemmiganur (JNTUA)
CGPA: 7.33/10.0

## Projects

**Vote for Future using Iris Recognition (B.Tech Project)** **12/2022 - 05/2023**

- *Technologies Used: Python, Django, OpenCV, MySQL/SQLite, HTML, CSS, JS*
- Developed a **secure e-voting system** using **Django framework** to enable reliable and transparent digital voting
- Implemented **iris recognition using OpenCV** for biometric-based voter authentication, reducing chances of duplicate and fraudulent voting
- Designed **user registration, authentication, and voting modules** ensuring data integrity and access control
- Integrated **database management system** to store voter details and voting records securely
- Improved system security by incorporating **unique biometric identification instead of traditional login methods**
- Collaborated in a **team-based development environment** to deliver a functional prototype within academic timelines
- **GitHub Repository:** [click here]

## Internship Experience

**Web Development Intern** **08/2022 - 10/2022**
*Internshala Trainings (Virtual)*

- Contributed to **web application development** using **HTML5, CSS3, JavaScript, and React.js** to build responsive and user-friendly interfaces
- Implemented **interactive UI components and form validations**, improving user experience and reducing input errors
- **GitHub Repository:** [click here]

## Certifications

- **Java Full Stack Developer** from **JSPiders** (**08/2023 - 03/2024**).

## Academic Achievements & Activities

- Completed **Java Full Stack Development training** at JSPiders, gaining hands-on experience in real-world application development
- Participated in **web development projects and coding practice**, strengthening problem-solving and programming skills
- Actively worked on **academic and personal projects** including full-stack and backend systems
